SUMMARY

- Full Stack Developer with a Computer Science (AI & Data Science) background, focused on building complete web applications end to end – responsive frontends with HTML, CSS, and JavaScript/React, backed by Flask APIs and Firebase/SQL data layers, shown across 3 independently built projects. Brings added strength in data analysis from a Data Science internship.

EXPERIENCE

- SmartBridge** Bhimavaram, India
 - Data Science Intern* 2025
 - Data Analysis:** Analyzed and visualized datasets using Python, SQL, and Tableau as part of a structured data science internship program.
 - Data Cleaning:** Cleaned and processed raw survey and tabular datasets, resolving missing values and inconsistent formatting to improve data quality for downstream analysis.
 - Dashboards:** Designed 3+ interactive Tableau dashboards and data stories to support data-driven decision-making for stakeholder review.

PROJECTS

- AgriVision – Crop Recommendation System**
Full-stack ML web application that recommends crops based on soil and weather inputs; trained the prediction model, built a Flask backend serving inference APIs, and integrated frontend forms for user interaction. Built during Smart India Hackathon (Internal Round).
- College Food Choices – Data Visualization (Tableau)**
Cleaned and analyzed a college dietary survey dataset using Python and SQL, then built interactive Tableau dashboards surfacing food, health, and lifestyle trends across the student population.
- RepoLogic – GitHub Repository Analyzer**
AI-powered web application that explains public GitHub repositories using Retrieval-Augmented Generation (RAG) with the Gemini API; lets users select code or ask natural-language questions and returns explanations with file and line references.

EDUCATION

- Vishnu Institute of Technology** Bhimavaram, India
 - B.Tech in CSE (AI & Data Science); CGPA: 8.33* 2023 – 2027
- Sri Chaitanya College** Chittoor, India
 - Intermediate (MPC); 85.1%* 2021 – 2023
- Apollo EM High School** Palakollu, India
 - SSC; 92%* 2021

TECHNICAL SKILLS

- Languages:** Python, Java, JavaScript, SQL
- Frontend:** HTML, CSS, React
- Backend:** Flask, Node.js, Firebase
- Databases:** SQL, Firestore
- Data/ML Tools:** Pandas, NumPy, scikit-learn, Tableau, Excel
- Version Control:** Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

- Programming in Java — NPTEL (IIT Kharagpur)
- Pandas & NumPy — Kaggle
- Data Science Virtual Internship — Altair
- Web Full Stack Development — EduSkills

ACTIVITIES

- Participated in Smart India Hackathon (Internal Round), Vishnu Institute of Technology – built the AgriVision project during the event.
- Open Source Contributor, GirlScript Summer of Code (GSSoC) 2026 – contributed to open-source repositories via pull requests and issue resolution, gaining hands-on experience with documentation, the PR review process, and resolving merge conflicts.
